a/d/s/ Customer Service

The a/d/s/ Customer Service Department is open 9:00 am to 5:00 pm est. In order to expedite phone order processing, please have your a/d/s/ account number and your purchase order number ready when calling. Orders may also be placed via fax 24 hours a day (508-658-8498). In addition to our toll phone lines, a/d/s/ also has a toll free number (1-800-522-4434). When placing orders please include the a/d/s/ part number when listed in this schedule. If the a/d/s/ part number is unknown, the part should be ordered by providing a complete description including product model number, serial number, component type, and physical or circuit location. To avoid errors, any orders placed without a/d/s/ part numbers should be phoned in directly to the a/d/s/ Customer Service Department.

Speaker parts guide

What follows is a listing by model of the common replacement parts (tweeters, midranges, woofers and grilles) used in a/d/s/ speakers. When component part numbers are changed on a model, the serial number break points are generally provided. In a few cases the serial numbers are approximate. Some speakers have experienced no changes, while others quite a few. The starting serial numbers of the major changes are listed below the product description. A few part changes do not correspond with major changes, so to be safe, have serial numbers available when placing orders.

Please do not attempt to upgrade older speakers by ordering the latest parts. These parts may not physically fit and/or will not sound correct. When newer improved a/d/s/ drivers are determined to be direct replacements for original drivers, a/d/s/ will automatically substitute them when the original parts are ordered. Drivers ordered through the a/d/s/ Customer Service Department should be used only as direct replacements in a/d/s/ loudspeakers. Sales of a/d/s/ replacement drivers to customers is to be done on an exchange basis only!

NOTE: Dealers with open accounts who order drivers without initially returning the defective ones, will pay a core charge in addition to the dealer exchange price. Upon receipt of the defective drivers, a/d/s/ will credit the dealer's account for the core value. Dealers and Service Stations who do not presently have open accounts with a/d/s/, must return defective drivers before receiving replacements.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE

Dealer warranty coverage requirements

All parts returned to a/d/s/ for warranty exchange or credit should be accompanied by a copy of the original proof of purchase. As the a/d/s/ warranty cards state, it is the customers' responsibility to provide the original sales receipt when requesting warranty repair on a/d/s/ products. Rewritten sales receipts and warranty cards will not assure warranty status. Statements on return paperwork such as "Warranty", "Replace at no charge" or "Store stock" will not assure warranty coverage.

a/d/s/ will cover, at no charge, first time single driver replacements on a/d/s/ loudspeakers, provided they are returned with proper documentation showing that the product is "under warranty". Returned drivers that are physically damaged or that have had part stickers removed or defaced will not be covered. Repeat and multiple driver failures must be returned to a/d/s/ for warranty evaluation. Previously replaced drivers will bear a "replacement part" or "R P" sticker. Since the warranty that a/d/s/ offers is against defects in materials and workmanship, parts returned which are evaluated and found to have been damaged (not defective) will not be covered under warranty.

Drivers returned claiming "warranty" but without the above mentioned sales documentation will be considered for warranty coverage, provided the product that the part is from was produced within the warranty period (plus 6 months) of the products warranty period. These parts must be received by a/d/s/ undamaged so that they can be evaluated.

Drivers returned as store stock must be new and must be defective out of the box (manufacturing defects) in order to be covered under warranty. Drivers removed from loudspeakers that have been sold to customers must be returned as customer property, not as "store stock". Loudspeakers sold to customers that require service should be repaired, not exchanged, using a/d/s/ replacement parts.

Drivers returned as "store stock demo" will be covered at no charge provided it is a first time replacement on a current production model. Excessive or repeated claims for "store stock demo" will not be covered without evaluation.

a/d/s/ replacement drivers replaced outside of warranty will be covered for defects in materials and manufacturing for 90 days. **Replacement parts claimed as "under warranty" must be returned to a/d/s/ with a copy of the original sales receipt and a request for warranty evaluation.**

Speaker crossovers, cabinets and housings

All a/d/s/ speaker crossovers, cabinets and housings requiring replacement must be returned directly to a/d/s/. a/d/s/ Customer Service will not accept or ship orders for these components without first receiving the originals.

All cabinet and housing replacements on a/d/s/ loudspeakers will be performed exclusively at the factory.

Speaker crossovers, cabinets and housings (cont.)

When servicing an a/d/s/ loudspeaker, look for problems in the crossover only after exhausting all other possibilities. a/d/s crossovers are ruggedly constructed and unless there are obvious burnt components or cold solder connections, the chances are that the crossover is not the cause of the problem. If the crossover has damaged components, the crossover may be returned to the factory for repair or replacement, or the damaged components on the crossover may be ordered individually by description.
