## **McIntosh Laboratory Introduces The MA2275 Vacuum Tube Integrated Amplifier**

**Binghamton, NY December 15, 2003**—McIntosh Laboratory, a world leader in home entertainment systems for over 53 years, introduces the **MA2275 Tube Integrated Amplifier**.

Producing a minimum of 75 watts per channel in stereo with 2, 4, or 8-ohm speakers, the MA2275 combines classic McIntosh vacuum tube audio performance with state-of-the-art control circuitry. Flexibility is never compromised in a McIntosh. The MA2275 features include a built-in low noise moving magnet phono input, one set of XLR jacks for a balanced input, 6-sets of unbalanced inputs, preamp out/amplifier in loop, and an extra set of pre-outs.

The exclusive McIntosh Unity Coupled output circuit evenly distributes the load to the output tubes and provides clean power over the entire frequency range in the MA2275 power stage. This unique feature enables the MA2275 to operate at maximum efficiency with extremely low noise and distortion while delivering full power without stress. McIntosh Silent Electromagnetic Input Switching utilizes ruthenium contacts sealed in glass cylinders filled with an inert gas to prevent signal degradation. Because the switching nodes are located on circuit boards at the inputs themselves, McIntosh Silent Electromagnetic Switching eliminates internal wiring in the signal path and literally brings the switch to the input.

The MA2275 will ship early 2004 will be officially introduced at CES 2004 where it can be seen along with McIntosh's other outstanding products at the McIntosh booth located at Alexis Park in the Executive Board Rooms.

## **About McIntosh Laboratory**

In an era where the rate of change is as amazing as the changes themselves, McIntosh is all the more remarkable. Even after celebrating its 53rd anniversary, the McIntosh brand continues to represent high performance, superlative engineering and limitless pride of ownership. State-of-the-art technology infused with hand craftsmanship and the details McIntosh is famous for continue to be the key values found in every piece of equipment. Products built to last for decades of flawless performance demand nothing less than an equal level of commitment to customer support and service as well. Its no wonder satisfied customers the world over view their McIntosh products as investments worthy of being passed down through generations.
