

Compulsive audio perfectionists! Let our nice \$279 speaker relieve you of your agony.

We fully understand how much you're suffering.

Maybe you just took a thousand-dollar loss getting rid of all your six-foot high electrostatic panels because they were blotting out the sun and killing your wife's potted plants.

Maybe you're lusting for a pair of those four-figure corner horns, but your listening room lacks corners.

Or perhaps you're tinkering with the electronic crossover for a quadri-amp speaker system with ionized-air tweeter.

Let us take you away from all this.

For only \$279, we offer you an elegantly simple device called the **Rectilinear III**.

It stands just under three feet tall on one and a half square feet of floor space and its sleek oiled-walnut cabinet houses everything you need: a 12" woofer, a 5" dual-cone midrange driver, two 2½" tweeters, two 2" tweeters and a crossover network, all of them of quite finicky design.

You connect the **Rectilinear III** to any low-distortion amplifier or

receiver of at least medium power, and what you hear will be easily in the same class with the most agonizingly exotic speaker system. We promise.

But, of course, you don't have to rely on our promise. The electronics editor of *Popular Science*, for example, wrote of the **Rectilinear III** as "the finest loudspeaker I've ever listened to, regardless of size, type or price." *Stereo Review's* equipment tester,

Julian Hirsch, wrote that "we have never heard better sound reproduction in our home, from any speaker of any size or price." Okay?

The only drawback of the **Rectilinear III** is that it may be too uncomplicated and painless for certain audio perfectionists. But just think how much time it can save for other, related hobbies. Like music.
