CHANGE TO NEW IC-CIRCUIT

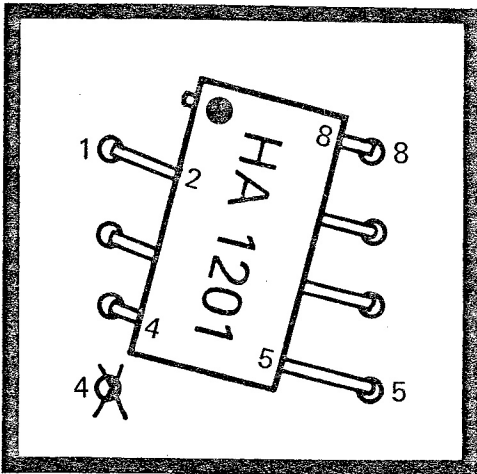

Circuit UA703HC is no longer available from our Spare Parts Department. This IC-circuit is replaced by HA1201, part No. 417824 (U201 and U202).

When the IC-circuit has to be changed to HA1201, the following must be done:

Cut off leg No. 1 on the IC-circuit.

Put the legs No. 5-8 into the holes 5-8.

Then turn the circuit slightly (see figure) so that hole No. 4 in the PC-board is not used and enter the three legs No. 2-4 as shown in the figure.
